

IBRAHIM KASOMA

Senior Frontend Engineer · React, Next.js & TypeScript

Stroud, England, UK · open to remote and hybrid · kasomaibrahim@gmail.com
[linkedin.com/in/kasomaibrahim](https://www.linkedin.com/in/kasomaibrahim) · kasomaibrahim.dev · github.com/akibrahimug

3.4M monthly users served · 60+ international markets · 60% faster page loads · CI/CD 45 min → 15 min · 20+ microfrontends consolidated · production incidents down 40%

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 6+ years building React, Next.js, and TypeScript platforms used by millions of people across 60+ international markets. Owns frontend architecture end to end, from Nx monorepo design and shared CI/CD to CMS-driven systems where load time and release confidence are tracked as business metrics. Strongest where a fragmented frontend estate needs consolidating into a platform that several product teams can ship from daily.

Currently building out cloud and platform depth alongside frontend work: Docker, Terraform, Kubernetes, and developer tooling.

CORE SKILLS

- **Frontend:** React, Next.js, TypeScript, JavaScript (ES6+), Gatsby, Redux, React Query, Tailwind CSS
- **Architecture & Tooling:** Nx monorepos, micro-frontends, Webpack, Vite, Storybook, design systems
- **CI/CD & Cloud:** GitHub Actions, Vercel, AWS (S3, CloudFront), GCP, Docker, release automation
- **Backend & APIs:** Node.js, REST APIs, GraphQL, Express
- **Testing & Quality:** Jest, React Testing Library, Cypress, Sentry
- **CMS & Content:** Storyblok, Contentful, headless CMS architecture

EXPERIENCE

EF EDUCATION FIRST · London, UK (Hybrid)

Senior Frontend Engineer

Mar 2023 – Present

- Owns the shared CI/CD platform behind 17 production frontends deployed across 60+ markets. Parallelised builds and removed repeated package installs to bring pipeline duration from 45 minutes down to 15, enabling daily multi-region releases.
- Diagnosed rendering and loading bottlenecks on a Next.js platform serving 57 international markets and 3.4M monthly users; the resulting work cut page load times by 60%, a 3-second TTI improvement, and lifted all three Core Web Vitals.
- Architected the Nx monorepo now used by 8 product teams, consolidating 20+ microfrontends and retiring 15,000+ lines of duplicated code behind a single shared build and release pipeline.
- Led the headless CMS migration to Storyblok and Next.js for 3 production blogs covering 40+ languages and 3.4M monthly users, cutting load time by 45% and enabling same-day global content deployments.
- Established the shared component library the frontend estate now standardises on, ending duplicate component work across product teams.
- Introduced structured testing with Jest and React Testing Library, lifting coverage from ~30% to 85% and reducing production incidents by ~40%.
- Mentors engineers through code review and architecture discussions, and negotiates API contracts with backend teams for multi-region applications.

SAN DAMIANO LTD · Surrey, UK (Hybrid)

Frontend Engineer (Full-Stack JavaScript)

Jun 2022 – Feb 2023

- Built internal tooling with React, Node.js, and Express that streamlined core business operations and increased employee productivity by ~40%.
- Automated manual workflows end to end, cutting critical processes from 4 hours to under 5 minutes.
- Designed and implemented REST APIs powering role-based frontend experiences across multiple internal user types.

FREELANCE WEB APPLICATION DEVELOPER · London, UK

Feb 2020 – Nov 2022

- Delivered end-to-end web applications for multiple clients using React, JavaScript, and Node.js, owning each engagement from requirements through production deployment.
- Integrated third-party REST APIs and shipped production-ready releases with responsive, accessible frontends.
